

Trương Lý Quốc Toàn

Software Developer

0865652220

toandev2505@gmail.com

Ho Chi Minh City

OBJECTIVE

Detail-oriented Software Engineer with a strong focus on **Java (Spring Boot)** and **Microservices architecture**. Proven ability to optimize system performance, successfully reducing API latency by **60%** through **AI integration** and **batch processing**. Committed to writing clean, scalable code and delivering high-quality technical solutions.

SKILLS

Programming	Java, PHP, Javascript, Python
Backend	Spring Boot, RESTful API, FastAPI
Database	MySQL, MongoDB, SQLite, PostgreSQL
Frontend	Reactjs, JSP, Bootstrap, Ajax
Tools	Git / GitHub, Docker, JMeter

PROJECTS

Real Estate Customer Management	02/2026 - Now
Tech: Java Spring Boot 3, FastAPI, MySQL, Scikit-learn, REST API, AJAX	
Optimized Business Workflow: Reduced manual property screening time by 70% by integrating an AI Lead Scoring model that automatically ranks customer potential. - Implemented authentication & role-based authorization using Spring Security Intelligent Data Processing: Developed a mechanism to automatically extract customer requirements from search history, capturing 100% of Search Intent to feed the machine learning model without manual data entry. Optimized system performance by 60%, reducing end-to-end latency from 1.7s to 0.7s for AI-driven lead scoring features. - Implemented soft delete mechanism to preserve customer history instead of permanently removing records

WORK EXPERIENCE

Software Development Lab – Ho Chi Minh City University of Education (HCMUE)	02/2026 - 05/2026
BACKEND DEVELOPER INTERN	
Architecture & Tech Stack: Monolith Architecture, Layered Architecture, FastAPI, Pydantic, RESTful API, PostgreSQL, Git, Pytest. System Analysis & Design: Designed Use Case Diagrams for Proposer actor, Activity Diagrams for Admin Security, DFD Level 1 to model the complex business data rotation. Backend Development: Implemented CRUD and business logic to control 5 data lifecycle states: <i>Draft -> Pending -> Rejected / Verified -> Published</i>, ensuring high data integrity. Collaboration: Operated in a Agile/Scrum environment; actively participated in Daily, Sprint Planning, and Sprint Review meetings; collaborated on code reviews and resolved merge conflicts	

HONORS & AWARDS

First Prize – “Coder Tiềm Năng 2023” Sai Gon Technology University - STU	2023 - 2024
- Awarded First Prize in a university-level programming competition. - Recognized for problem-solving ability, algorithmic thinking, and coding performance.	
Participant – Web3Hackfest (Blockchain & AI)	
- Participated in a technology competition focused on Blockchain and Artificial Intelligence. - Gained exposure to decentralized applications, smart contracts, and AI-driven solutions. - Collaborated in a team environment to develop innovative tech solutions under time constraints.	

EDUCATION

Saigon Technology University	2022 - Now
Software Engineer	
4th-year student majoring in Software Engineering
